Dear Madame Vice-President,

With reference to your letter sent on 12 December I would like to bring to your attention the facts and considerations included in a separate document attached to this letter regarding the recently adopted legislation in Hungary. I share your view that the impacts of the new Fundamental Law of Hungary shall be evaluated in the context of the implementing legislative, administrative and judicial practice. In addition, I am convinced that all the issues you raised will be answered satisfactorily.

I understand that the Commission is eager to learn the details of the reforms undergoing implemented in Hungary. My services did their best to answer all of your queries within the tight deadline you suggested and hope you have now all information necessary for the assessment of the issues on table.

Yours sincerely,
